

National Diabetes Audit: are services providing good quality diabetes care?

Report at a glance 2016-17

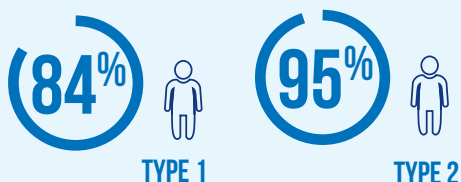

The National Diabetes Audit measures the quality of care provided to people with diabetes. The information in the audit is collected and submitted by GP practices and specialist diabetes services in England and Wales.

The results (of respondents to the 2016-2017 audit)

This report includes information on nearly  **3.2M** PEOPLE WITH DIABETES

WE SAY

There have been some improvements in diabetes care. But there is still a need for big improvements in many areas. There are differences in outcomes between:

- DIFFERENT SERVICES
- YOUNGER AND OLDER PEOPLE WITH DIABETES
- PEOPLE WITH TYPE 1 AND TYPE 2 DIABETES

Finding out why will be an important part of improving diabetes care.
