If you want to learn more about diabetes, the Primary Care Course at the Diabetes UK Professional Conference gives you the essentials you need to deliver excellent diabetes care.

The one-day course will increase your knowledge, provide core resources and help you implement effective lifestyle advice, crucial to the delivery of diabetes care for your patients.

Why should you attend in 2019?

- **Learn** more about seven essential areas of diabetes management in a primary care setting.
- **Network** with primary care colleagues and diabetes specialists.
- **Earn** CPD when you attend every session.
- **Explore** more than 60 exhibition stands and 500 abstract posters in the Diabetes UK Professional Conference exhibition.
The course covers seven essential areas of diabetes management:

- HbA1c: Translating guidelines into practice
- Blood pressure and lipids: Can we do better?
- Lifestyle management and diabetes
- Living with diabetes and managing emotional distress
- Chronic kidney disease: Keeping kidneys healthy
- Feet: Keeping feet healthy
- Contraception and pregnancy: Are we talking about the birds and bees?

“Emphasis on lifestyle changes is key in diabetes management. I am putting a lot of the information learned immediately into practice”

2018 delegate

Friday, 8 March 2019
8:30am to 4:30pm
£25+VAT
ACC Liverpool, Kings Dock, Liverpool L3 4FP
