

Diabetes and high blood pressure

Information prescription

Your last blood pressure reading is	
-------------------------------------	--

People with diabetes and high blood pressure are at increased risk of having a heart attack or stroke. By lowering your blood pressure, you can dramatically reduce your risk.

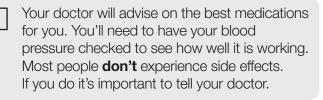

Recommended target for blood pressure is lower than | 130/80

Keep to a healthy weight

Eat a healthy balanced diet

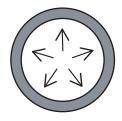

What does blood pressure mean?

It's the force your heart needs to push blood around your body. The two numbers show the biggest force your heart uses to push your blood and the least pressure when your heart has relaxed.

Reduce the size of your portions. Cut down on fatty and sugary foods.

Blood vessel

Normal

High

When is high blood pressure a problem?

High blood pressure (sometimes called hypertension) is when the force used to push blood around your body is normally higher than recommended. High blood pressure puts more strain on your heart and blood vessels. If you have high blood pressure, you may feel healthy, but it is causing damage to blood vessels.

low-salt options, and do not add salt. If you drink, cut down on alcohol. Eat plenty of vegetables and fruit - aim for at least five portions a day. Eat less fatty foods, processed meats, full-fat dairy, pastries and cakes. Aim for at least two portions of oily fish a week. Get more active Aim for 30 minutes five times a week to raise your heart beat. Activities like walking fast and cycling all count. Add some activity that strengthens your muscles, like gardening or yoga, twice a week.

Reduce salt: eat less fast food, choose

How can I lower my blood pressure?

Lifestyle changes are proven to reduce blood pressure and make you feel healthier. Most people with diabetes will need medication as well. Some people require more than one type of medicine.

Stop	smoking	

For help giving up ask for your local stop smoking service.

Agreed action plan

My personal goal is:

To be achieved when:

The two steps that I will take to achieve this are:

(Discuss and agree with your doctor or nurse. Think about what, where, when and how?)
